Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM  
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 8/22/03 & 4/16/04.
- 2a) This action is FINAL.                            2b) This action is non-final.

## DETAILED ACTION

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

---

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because phrase "the present invention" and word "means" appear in the abstract. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wieclawski (#6,273,511).

Wieclawski shows a vehicle seat comprising a headrest supporting frame having a lower end secured to a recliner (18) and an upper end provided with an insertion hole, a seatback frame (10) elastically connected to the headrest supporting frame, a plurality of elastic connecting means (22) that elastically couple the headrest supporting frame and the seatback frame, and a headrest adjusting bar that adjusts the height of a headrest.

With claim 2, the elastic connecting means is at least one tension spring having a sufficient stiffness to solidly support the back of a seat occupant in a normal state.

With claim 3, the upper end of the headrest adjusting bar is connected to a frame inside the headrest, and the lower end of the headrest adjusting bar is adjustably inserted into the inserting hole formed at the upper end of the headrest supporting frame.

With claim 5, left and right upright members are provided. Adjustment members are mounted atop each of the upright members to define adjusting holes, and headrest adjustment bar is received in the holes.

With claim 6, the elastic connectors comprise tension springs.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ronnhult et al, Charras et al, Nakane et al, Schonauer, Frusti et al, and Wiklund are cited as showing similar types of vehicle seat.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A Vu whose telephone number is 703-308-1378. The examiner can normally be reached on M-F from 8:30 am to 5:00 pm.
